

# Subject Index to Volume 28

## A

- Acetylcholine, mechanosensory pathways, colon to inferior mesenteric ganglion, G499
- Acetylcholinesterase, muscarinic cholinergic receptor, density, after small intestinal transplantation, G1057
- Acid: *see also* Gastric acid  
duodenal, gastric motility and, G540  
load, pH regulation, liver, G43  
nonparallel secretion, gastric oxyntopeptic cells (toad), G934
- Acidosis, cell survival and, gastric glands, G379
- Actin  
cGMP-elicited chloride secretion and, T84 cells, G370  
clearance, vascular, G1071
- Adenosine monophosphate, cyclic  
altered potassium transport, enteritis and, jejunum (piglet), G388  
glucagon-like peptide actions, gastric chief cells, G118  
histamine-induced production, gastric carcinoma cell line MKN-45, G987  
nitric oxide, VIP-mediated activation of, gastric muscle cells, G660
- Adenosine triphosphatase  
calcium pump isoform, intestinal plasma membrane, G917  
G proteins and, hepatic plasma membranes, G686
- Adenosine triphosphate, gastric mucosal, endothelin role in ethanol-induced injury, G474
- Adenylate cyclase, distribution, hepatic plasma membranes, G686
- $\beta$ -Adrenoceptor agonists, cardiac response to, obstructive jaundice, G314
- Afferent nerves  
extrinsic sensory, capsaicin actions, ileum (guinea pig), G51  
hepatic, mechanoreceptors with, G15  
rectal, octreotide effects, G742  
vagal, somatostatin inhibition, G251
- Airway, protection, laryngeal closure and deglutition, G704
- D-Alanine, urinary, gastrointestinal bacteria and, G699
- Albumin, fatty acid binding, calibration of, heptane-water partition, G555
- Alkaline, secretion, duodenal mucosal blood flow and, G1029
- Alkalinization, intracellular, bile secretion and, liver, G347
- Alkalosis, cell survival and, gastric glands, G379
- Allergens, food, common mucosal immune system, G599
- Amiloride  
enterocyte transport, pH regulation of, G677  
hydrogen-bicarbonate secretion and, bile duct, G719  
intracellular pH-regulating ion transport, parietal cells, G903
- Amino acids  
intestinal absorption, coupling of membrane digestion with, G409  
transport, sodium-dependent, liver, G90  
transport systems, expression of, intestine, oocytes, G99
- D-Amino acids, urinary activity, G699
- Ammonia, effects on function, gastric mucosa (frog), G277
- Ammonium ion, effects on function, gastric mucosa (frog), G277
- Anal sphincter  
internal, carbon monoxide inhibitory effects, G799  
mechanical properties, smooth muscle, G792
- Angiotensin II, autoradiography of receptor subtypes, intestine, G21
- Anions, organic, transport, hepatobiliary secretion defect and, G445
- Anoxia, cell survival and, gastric glands, G379
- ANP: *see* Atrial natriuretic peptides
- Anti-endothelin-1 antibody, ethanol-induced injury and, gastric mucosa, G474
- Arachidonic acid  
leukotriene production, gastric mucosal cells, G1021  
metabolism, cytochrome P-450-dependent, intestine, G735
- Arterioles, submucosal, capsaicin actions, ileum (guinea pig), G51
- Ascites, liver cirrhosis, pressure diuresis and natriuresis in, G1045
- Aspartate aminotransferase, mitochondrial isoform of, plasma membrane transport, liver, G894
- ATP: *see* Adenosine triphosphate
- ATPase: *see* Adenosine triphosphatase; Sodium-potassium-ATPase
- Atrial natriuretic peptides, receptors: *see* Receptors
- Atropine  
neural mediation, choleraic mucin secretion, G1050  
regulation, paracellular permeability, Caco-2 cells, G955
- Autonomic nervous system, neurons, sphincter of Oddi region (guinea pig), G258
- Autoradiography  
actin clearance, organ uptake and, G1071  
angiotensin II receptor subtypes, intestine, G21
- Autoregulation  
histamine synthesis, fundic mucosal cells, G1039  
pressure diuresis and natriuresis, liver cirrhosis, G1045
- Bacteria, gastrointestinal, urinary D-alanine, G699
- Bafilomycin A<sub>1</sub>, hydrogen-bicarbonate secretion and, bile duct, G719
- Barium, potassium conductance, esophageal epithelium, G28
- Bethanechol, somatostatin inhibition, central vagal stimulation, G251
- Bicarbonate  
biliary secretion, ursodeoxycholic acid and, G783  
secretion  
duodenal, cholinergic regulation of (guinea pig), G270  
pH regulation, duodenal enterocytes, G677
- Bile  
flow, intracellular alkalinization and, liver, G347  
formation, electrogenicity, hepatocytes, G73
- Bile acids  
binding, transport proteins and, ileum, G56  
bumetanide transport, hepatocytes (skate), G926  
hepatocellular uptake, bumetanide derivatives and, G942  
intracellular, transport, cytoplasmic binding protein effects, sex differences, G831  
plasma membrane, liver, G686  
secretion, ursodeoxycholic acid and, G783  
transport, cholephilic anion interaction, placenta, G242
- Bile duct  
epithelial cells, intracellular pH, ursodeoxycholic acid regulation of, G783  
hydrogen-bicarbonate secretion, secretin effects, G719
- Bile salts, transport, sodium-coupled, electrogenicity of, hepatocytes, G73
- Bilirubin, hepatobiliary secretion defect, organic anion transport with, G445
- Blood flow: *see also* Microcirculation  
duodenal, alkaline secretion and permeability in, G1029  
gastric, tactile stimulation of gastric mucosa and, G303  
gastric mucosal, laser-Doppler velocimetry and reflectance spectrophotometry, G595  
intestinal, nitric oxide role in, G189  
pancreatic, radiolabeled microspheres, G587  
renal, liver cirrhosis, G1045
- Body, total, galactose elimination (pig), G9
- Brain, liver failure effects, thioacetamide-induced, G572
- Bumetanide  
derivatives of, hepatocellular bile acid uptake and, G942  
transport, hepatocytes (skate), G926

## C

- Caco-2 cells  
intestinal  
dipeptide transport, membrane, G289  
sodium-potassium-ATPase gene expression in, G775  
membrane phosphoinositide turnover, vitamin D<sub>3</sub> effects, G143  
paracellular permeability, regulation by protein kinase C, G955
- Calcium  
absorption, intestinal plasma membrane, G917

Calcium (*continued*)

- cytosolic, 1,25(OH)<sub>2</sub>D<sub>3</sub> effects, Caco-2 cells, G143
- flux, glucagon actions and, hepatocytes, G35
- influx, G protein-coupled, VIP mediated, gastric muscle cells, G660
- signal transduction pathways, gallbladder tonic contraction, G1082
- Calcium currents, voltage-activated, vasoactive intestinal contractor effects, parasympathetic neurons, G1158
- Calcium ionophore A23187, bicarbonate secretion and, duodenal (guinea pig), G270
- Calmodulin
  - signal transduction pathways, gallbladder tonic contraction, G1082
  - transport, duodenal crypt cell line, G851
- cAMP: *see* Adenosine monophosphate, cyclic
- Capillaries, exchange capacity, intestine, postnatal (swine), G1090
- Capsaicin
  - action, submucosal arterioles, ileum (guinea pig), G51
  - duodenal acid inhibition, gastric motility, G540
  - neural mediation, choleraic mucin secretion, G1050
- Carbachol
  - regulation, paracellular permeability, Caco-2 cells, G955
  - secretin antagonist effects, exocrine pancreatic secretin (guinea pig, rat), G805
- Carbon monoxide, inhibitory effect, internal anal sphincter, G799
- Cardiovascular system, neuroeffector mechanisms, experimental cholestasis, G579
- CCK: *see* Cholecystokinin
- Cells: *see also* specific cell
- survival, gastric glands, G379
- cGMP: *see* Guanosine monophosphate, cyclic
- Chest pain, esophageal peristalsis, topography of, G1098
- Chief cells, gastric, glucagon-like peptide actions, G118
- Chinese hamster ovary cells, signal transduction, CCK-A receptors, G999
- Chloride
  - cotransport, small intestine, G979
  - permeability: *see* Permeability secretion
  - contractility and, distal colon (guinea pig), G973
  - LTD, stimulation of, distal colon, G467
  - transport, electrogenic, gastric mucosa (frog), G277
- Chloride-bicarbonate exchange, alkalization, bile flow and, liver, G347
- Chloride-bicarbonate exchanger, ammonia effects, gastric mucosa (frog), G277
- Cholate, hepatocellular uptake, bumetanide derivatives and, G942
- Cholecystokinin
  - duodenal acid inhibition, gastric motility, G540
  - gastrointestinal inhibitory nerves, G759
  - mechanism of action, gastroduodenal motility (chicken), G842
  - phospholipidase D and, pancreatic acini, G725
  - receptors: *see* Receptors

- receptor subtypes, gallbladder and pancreas (guinea pig), G1116
- regulation, pancreatic intrinsic factor secretion, G178
- release, indirect dietary regulation of, G107
- signal transduction and, G999
- Cholecystokinin-A, receptor: *see* Receptors
- Cholecystokinin octapeptide
  - inhibition, pancreatic enzyme secretion, G251
  - secretin antagonist effects, exocrine pancreatic secretin (guinea pig, rat), G805
- Cholephilic anions, interaction, bile acid transport, placenta, G242
- Cholera toxin
  - mucin secretion induced by, neural mediation of, G1050
  - plasma membrane, liver, G686
- Cholestasis, experimental, neuroeffector mechanisms in, G579
- Choline acetyltransferase
  - antibodies against, identification of cholinergic neurons, G1005
  - muscarinic cholinergic receptor, density, after small intestinal transplantation, G1057
- Cholinergic nerves, mechanosensory pathways, colon to inferior mesenteric ganglion, G499
- Cirrhosis
  - gastric mucosal integrity, prostaglandin modulation of, G453
  - pressure diuresis and natriuresis in, G1045
- Clearance, actin, vascular, organ uptake and, G1071
- Cobalamin, secretion, hormonal regulation of, G178
- Collagen, mechanics, anorectal smooth muscle, G792
- Colon
  - distal
    - chloride secretion, LTD, stimulation of, G467
    - contractility, chloride secretion and (guinea pig), G973
    - stimulation of chloride permeability in, G423
  - expression, PAP, during acute pancreatitis, G611
  - guanylate cyclase pathways, peptide-regulated, G394
  - plasma membrane, calcium pump isoforms, G917
  - sucrase-isomaltase gene expression, regulation of, G526
- Colonic cells, multiple ion transport mechanisms, propionate effects, G564
- Colonic nerves, lumbar, extrinsic control of circular muscle, G1064
- Connexin 43, gap junction, expression, regional tissues of intestine, G911
- Coupling, cell-to-cell, connexin-43 expression, intestine, G911
- Crypt cells, small intestine, serotonin receptors on (guinea pig), G339
- Cyanobacteria, hepatotoxicity, protein phosphatase inhibition by microcystin, G224
- Cyclin, cyclin-dependent kinase 1 and, regenerating liver, G857
- Cyclooxygenase
  - biphasic effects, esophageal longitudinal muscle (opossum), G403

- inhibition, macromolecular transport and, gastric mucosa, G1135
- Cytochrome P-450, amino acid metabolism dependent on, intestine, G735
- Cytoprotection, cirrhosis, prostaglandin modulation of gastric vasculature, G453

## D

- Development: *see also* Growth; Maturation
  - gastrointestinal tract, neurotensin expression in, G482
  - maternal sialoadenectomy effects, gastric response to hydrogen, G354
- Dexamethasone, nitric oxide synthase, intestinal cell viability and, G214
- Diacylglycerol, signal transduction pathways, gallbladder tonic contraction, G1082
- Diarrhea
  - infectious, peptide-regulated guanylate cyclase pathways in, G394
  - viral enteritis, potassium transport and, jejunum (piglet), G388
- Dibromosulphothalein, hepatobiliary secretion defect, organic anion transport with, G445
- Diet: *see* Feeding
- Digestion, membrane, coupling with intestinal absorption of sugars and amino acids, G409
- Digestive tract, flow, mechanoreceptors and, G310
- 1,25-Dihydroxyvitamin D<sub>3</sub>: *see* Vitamin D<sub>3</sub>
- S-2,4-Dinitrophenylglutathione, transport, liver, G547
- Dipeptide, transport, membranes, intestinal cell line Caco-2, G289
- Dipeptidyl peptidase IV, intestinal hydrolysis and, genetic evidence for, G81
- Disaccharidases
  - deficiency, intestine, G1150
  - intestinal, structural variants, G1141
  - maturation, EGF and, suckling, G459
- Diuresis, pressure, in cirrhosis, G1045
- Diuretics
  - loop
    - hepatocellular bile acid uptake and, G942
    - transport, hepatocytes (skate), G926
- DPP IV: *see* Dipeptidyl peptidase IV
- Duodenal mucosa
  - alkaline secretion, blood flow and, G1029
  - ornithine decarboxylase activity, vagotomy effects, G1016
- Duodenum
  - cholinergic regulation, bicarbonate secretion (guinea pig), G270
  - crypt cell line, polyamine transport in, G851
  - enterocyte transport, pH regulation of, G677
  - expression, PAP, during acute pancreatitis, G611
  - motility and emptying, acid-induced inhibition, G540
  - plasma membrane, calcium pump isoforms, G917
- Dysphagia, esophageal peristalsis, topography of, G1098

## E

- EGF: *see* Epidermal growth factor
- Eicosanoids, cytochrome P-450 and, intestine, G735
- Electrolytes, transport, intracellular pH regulation of, parietal cells, G903

- Encephalopathy, hepatic, thioacetamide-induced, G572
- Endothelial adhesion molecules, NSAID gastropathy and, G993
- Endothelin  
 endogenous, ethanol-induced gastric injury and, G474  
 voltage-activated calcium currents and, parasympathetic neurons, G1158
- Endothelin-1, submucosal injection, gastric ulcer induced by, G491
- Endotoxin  
 actin clearance, organ uptake and, G1071  
 heat-stable, chloride secretion evoked by, T84 cells, G370
- Enteric nervous system  
 cholinergic neurons in, identification by antibodies against choline acetyltransferase, G1005  
 control, migrating spike complexes, small intestine, G628  
 neurons, sphincter of Oddi region (guinea pig), G258  
 nitric oxide, actions, myenteric plexus (guinea pig), G887
- Enteritis, viral, potassium transport and, jejunum (piglet), G388
- Enterochromaffin-like cells  
 histamine release, endogenous somatostatin effects, G521  
 histamine synthesis, autoregulation of, G1039
- Enterocytes  
 ileal, bile acid transport, G56  
 proximal duodenal, transport, G677
- Epidermal growth factor  
 maternal sialoadenectomy effects, gastric response to hydrogen, G354  
 maturation and, intestinal sucrase, suckling, G459  
 orogastric, phosphorylation, jejunal, G63  
 receptor: *see* Receptors
- Epinephrine, chloride permeability, colonic crypts, G423
- Epithelial cells  
 bile duct, intracellular pH, ursodeoxycholic acid regulation of, G783  
 gastric mucosal, TGF- $\alpha$  and, G361  
 intestinal  
 PACAP receptors, liver plasma membranes, G811  
 viability, nitric oxide synthase and, G214
- Esophageal sphincter, responses, vomiting, G963
- Esophagus  
 epithelium, potassium conductance in, G28  
 longitudinal muscle, biphasic effects of sodium nitroprusside (opossum), G403  
 responses  
 experimental intraluminal distension, G196  
 vomiting, G963
- Ethanol  
 acidified, gastric damage by, molecular hydrogen chloride role in, G133  
 gastric injury induced by, endothelin role in, G474
- Ethylendiaminetetraacetic acid, chromium-51-labeled, alkaline secretion and blood flow, duodenal mucosa, G1029
- Exendins, actions, gastric chief cells, G118
- Exocytosis, vesicular-mediated, intracellular alkalization effects, G347
- Extrahepatic biliary system, neurons, sphincter of Oddi region (guinea pig), G258
- F**
- F-actin: *see* Actin
- Famotidine, hydrogen-potassium-ATPase mRNA, gastric, G752
- Fasting  
 migrating spike complex  
 enteric nervous system control of, G628  
 small intestine, G619  
 myoelectric and motor activity, gastric, G646  
 regulation, PAP during acute pancreatitis, G611
- Fatty acid binding proteins, plasma membrane transport, liver, G894
- Fatty acids  
 albumin binding, calibration of, heptane-water partition, G555  
 intracellular, transport, cytoplasmic binding protein effects, sex differences, G831  
 short-chain, ion transport and, colon cells, G564
- Feeding  
 dietary regulation, CCK release, G107  
 iron deficiency, heme uptake and, intestinal mucosa, G712  
 ornithine decarboxylase activity, duodenal mucosa, vagotomy effects, G1016  
 regulation, PAP during acute pancreatitis, G611  
 sham, CCK receptor antagonist effects on satiety, G219
- Fenamate, activation, potassium current, jejunum, G873
- Filtration, glomerular, liver cirrhosis, G1045
- Flowmetry  
 laser-Doppler  
 alkaline secretion and blood flow, duodenal, G1029  
 gastric mucosal blood flow, G303  
 tumor necrosis factor- $\alpha$  and hepatocellular dysfunction, G126
- Flow probe, ultrasonic, pancreatic blood flow, G587
- Forskolin, nonparallel secretion, gastric oxyntopeptic cells (toad), G934
- Fundic mucosal cells, histamine synthesis, autoregulation of, G1039
- G**
- Galactose, elimination, hepatic, renal, and total body (pig), G9
- Gallbladder  
 CCK-A receptor subtypes in, cloning and expression (guinea pig), G1116  
 tonic contraction, intracellular pathways for, G1082
- Ganglia  
 paravertebral, mechanosensory pathways in, G499  
 pelvic, enteric nervous system, G1005
- Gastric acid  
 output, tactile stimulation of gastric mucosa and, G303
- raphe pallidus neuron stimulation of, TRH effects, G880
- secretion  
 omeprazole and, G231  
 PYY regulation of, neurotensin and oxyntomodulin effects, G113  
 stimulation by pancreatic polypeptides, G1169
- Gastric cancer, cell line MKN-45, desensitization of histamine H<sub>2</sub> receptors in, G987
- Gastric dilatation-volvulus, myoelectric and motor activity with, G646
- Gastric distension, CCK receptor antagonist effects, satiety, G219
- Gastric emptying  
 inhibition of, duodenal acid-induced, G540  
 myenteric denervation and, G654  
 nutrient feedback inhibition of, osmotically dependent duodenal resistance and, G672  
 pacing effects, G767
- Gastric glands, cell survival in, G379
- Gastric motility: *see* Motility
- Gastric mucosa  
 blood flow: *see* Blood flow  
 damage, lateral hypothalamic lesions and, G138  
 endothelin-1, potent vasoconstriction and intraluminal fluid, G491  
 epithelial cells, TGF- $\alpha$  and, G361  
 ethanol-induced injury, endothelin role in, G474  
 function, ammonia effects (frog), G277  
 histamine release, endogenous somatostatin effects, G521  
 injury, NSAID-induced, endothelial adhesion molecules in, G993  
 integrity, prostaglandin modulation of, in cirrhosis, G453  
 macromolecular transport, cyclooxygenase inhibition effects, G1135  
 tactile stimulation of, effects on blood flow and acid output, G303
- Gastric mucosal cells  
 histamine release, endogenous somatostatin effects, G521  
 leukotriene production in, G1021  
 mucus secretion, nitric oxide stimulation of, G418
- Gastric tone, plasticity, immunization against VIP and vagotomy (ferret), G432
- Gastric vasculature, prostaglandin modulation in cirrhosis, G453
- Gastrin  
 hydrogen-potassium-ATPase mRNA, gastric, G752  
 partial agonism, CCK receptor mediating pepsinogen secretion, G865
- Gastrin cells, responses, acidification of achlorhydric stomach, G440
- Gastrointestinal hormone, release, indirect dietary regulation of, G107
- Gastrointestinal tract, developing, neurotensin expression in, G482
- Gene expression  
 hepatocyte nuclear factor, intestinal crypts, G506  
 maturational, lactase, G1108  
 neurotensin, gastrointestinal tract, G482  
 sodium-potassium-ATPase, intestine and Caco-2 cells, G775  
 sucrase-isomaltase, regulation of, G526

- Genetic variation, intestinal, disaccharidases, G1141
- Glucagon, actions, calcium flux effects, hepatocytes, G35
- $\gamma$ -Glucosylase, deficiency, intestine, G1150
- Glucose, metabolism, glucagon actions on, calcium flux effects, hepatocytes, G35
- Glucuronide, hepatobiliary secretion defect, organic anion transport with, G445
- Glutamine, transport, sodium-dependent, liver, G90
- $\gamma$ -Glutamyltransferase, transport, liver, G547
- $\gamma$ -Glutamyltranspeptidase, bidirectional transport, membrane of Hep G2 cells, G1128
- Glutathione, bidirectional transport, membrane of Hep G2 cells, G1128
- Glutathione S-conjugate, transport and metabolism, liver, G547
- Glycoprotein, mucus, choleraic secretion, neural mediation, G1050
- G proteins, distribution, hepatic plasma membranes, G686
- Growth: *see also* Development; Maturation
- CCK receptors, PANC-1 human pancreatic cancer cell line, G149
- gastric mucosal epithelial cells, TGF- $\alpha$  and, G361
- pancreatic acinar cells, low- and high-affinity CCK receptors in, G1177
- Guanosine monophosphate, cyclic chloride secretion elicited by, F-actin effects, T84 cells, G370
- intestinal mucosal permeability, nitric oxide role in, G189
- metabolism, colonic expression of genes in, G394
- nitric oxide, VIP-mediated activation of, gastric muscle cells, G660
- stimulation, mucus secretion, gastric mucosal cells, G418
- Guanylate cyclase
- biphasic effects, esophageal longitudinal muscle (opossum), G403
- peptide-regulated pathways, colon, G394
- Gut: *see* Intestine

## H

- Haptocorrin, secretion, hormonal regulation of, G178
- Heart, function,  $\beta$ -adrenoceptor agonists and, obstructive jaundice, G314
- Helodermin, actions, gastric chief cells, G118
- Helospectin, actions, gastric chief cells, G118
- Heme, intestinal uptake, iron deficiency effects, G712
- Heme oxygenase, activity, nonadrenergic noncholinergic nerve stimulation and, G799
- Hepatobiliary secretion, defect, organic anion transport with, G445
- Hepatocellular dysfunction, tumor necrosis factor- $\alpha$  and, G126
- Hepatocyte nuclear factors, expression, intestinal crypts, G506
- Hepatocytes
- bumetanide transport (skate), G926
- glucagon action, calcium flux effects, G35
- glutamine transport, sodium-dependent, G90
- intracellular fatty acid transport, cytoplasmic binding protein role in, sex differences, G831
- sodium-coupled bile salt transport, electrogenicity of, G73
- Hepatotoxicity, protein phosphatase inhibition and, microcystins, G224
- Hep G2 cells, membrane, bidirectional transport of glutathione, G1128
- Heptane-water partition, calibration of albumin-fatty acid binding constants, G555
- Hexamethonium
- alkaline secretion and blood flow, duodenal mucosa, G1029
- bicarbonate secretion and, duodenal (guinea pig), G270
- CCK actions and, gastroduodenal motility (chicken), G842
- effects on blood flow and acid output, gastric mucosa, G303
- Histamine
- nonparallel secretion, gastric oxyntopeptic cells (toad), G934
- release, somatostatin effects, gastric mucosal cells, G521
- synthesis, autoregulation of, fundic mucosal cells, G1039
- Histidine decarboxylase, synthesis, autoregulation of, fundic mucosal cells, G1039
- Hormonal regulation, pancreatic intrinsic factor, G178
- HT29-18-C cells, multiple ion transport mechanisms, propionate effects, G564
- Hydrochloric acid, acidified ethanol and, gastric damage, G133
- Hydrocortisone, intestinal sucrose and, suckling, G459
- Hydrogen
- gastric response to, maternal sialoadenectomy effects, G354
- secretion, secretin effects, bile duct, G719
- Hydrogen-ATPase, vacuolar-type, secretin effects, bile duct, G719
- Hydrogen chloride, molecular, acidified ethanol and, gastric damage, G133
- Hydrogen ions
- backdiffusion, ammonia effects, gastric mucosa (frog), G277
- luminal, ammonia effects, gastric mucosa (frog), G277
- Hydrogen-potassium-ATPase
- gastric, histamine receptor regulation of, G752
- protein, omeprazole decrease in, oxyntic secretory membranes, G231
- Hydrolysis, intestinal, role of DPP IV in, genetic evidence for, G81
- Hydroxyecosatetraenoic acid, cytochrome P-450 and, intestine, G735
- 5-Hydroxytryptamine: *see* Serotonin
- Hyperosmolarity, cell survival and, gastric glands, G379
- Hypertension, portal, prostaglandin modulation of gastric vasculature, G453
- Hyposmolarity, cell survival and, gastric glands, G379
- Hypothalamus
- lateral
- lesions, gastric injury and, G138
- ornithine decarboxylase activity in duodenal mucosa and, G1016

## I

- IEC-6 cells, polyamine depletion, decreased protooncogene expression after, G331
- Ileitis, experimental, substance P levels in (guinea pig), G321
- Ileum
- arachidonic acid metabolism, cytochrome P-450-dependent, G735
- bile acid transport, intracellular, G56
- expression, PAP, during acute pancreatitis, G611
- 2-methyl-aminoisobutyric acid and chloride cotransport, G979
- neurogenic contractions, PACAP stimulation of, G295
- submucosal arterioles, capsaicin actions (guinea pig), G51
- Immune system, mucosal, integrative studies, G599
- Immunocytes, food allergens, integrative studies, G599
- Indocyanine green, hepatobiliary secretion defect, organic anion transport with, G445
- Indomethacin
- biphasic effects, esophageal longitudinal muscle (opossum), G403
- effects on blood flow and acid output, gastric mucosa, G303
- Inositol trisphosphate, formation, parotid acinar cells, G1122
- Inositol-1,4,5-trisphosphate, signal transduction pathways, gallbladder tonic contraction, G1082
- Interleukin-6, hepatocellular dysfunction and, G126
- Intestinal cells, dipeptide transport, apical and basolateral membrane, G289
- Intestinal crypts, hepatocyte nuclear factor expression in, G506
- Intestinal mucosa
- heme uptake, iron deficiency effects, G712
- ischemia-reperfusion, nitric oxide role in, G189
- Intestine
- absorption, dipeptide transporters in, Caco-2 cells, G289
- angiotensin II receptor subtypes in, autoradiography, G21
- arachidonic acid metabolism, cytochrome P-450-dependent, G735
- Caco-2 cells
- protein kinase C regulation of paracellular permeability, G955
- sodium-potassium-ATPase gene expression in, G775
- capillary exchange capacity, postnatal (swine), G1090
- chloride secretion, F-actin effects, T84 cells, G370
- differentiation, developmental expression of neurotensin, G482
- epithelium, crypts, hepatocyte nuclear factor expression in, G506
- experimental ileitis, substance P levels in (guinea pig), G321
- expression, PAP, during acute pancreatitis, G611
- immunophysiology, G599

- ion transport, propionate effects, HT29-18-C cells, G564
- lysine transport systems, oocytes, G99
- polyamine depletion, decreased protooncogene expression after, G331
- regional tissue, gap junction connexin 43 expression in, G911
- regulation, gastric secretion, G113
- sucrase-isomaltase gene expression, regulation of, G526
- Intestine, small
  - cholera toxin-induced mucin secretion, neural mediation of, G1050
  - crypt cells, serotonin receptors on (guinea pig), G339
  - $\gamma$ -glucoamylase deficiency, characterization of, G1150
  - heme uptake, iron deficiency effects, G712
  - 2-methyl-aminoisobutyric acid and chloride cotransport, G979
  - migrating spike complex
    - enteric nervous system control of, G628
    - fasting, G619
  - muscular plexus, interstitial cells in, G638
  - ornithine decarboxylase activity, vagotomy effects, G1016
  - sucrase-isomaltase complex, structural variants, G1141
  - transplantation, muscarinic cholinergic receptor density after, G1057
- Intracellular pathways, tonic contraction, gallbladder, G1082
- Iron, deficiency, heme uptake and, intestinal mucosa, G712
- Irritable bowel syndrome, octreotide effects, rectal afferent nerves, G742

## J

- Jaundice
  - obstructive
    - cardiac function in, G314
    - neuroeffector mechanisms in, G579
- Jejunum
  - EGF receptor phosphorylation, suckling, G63
  - fenamate activation, potassium current, G873
  - ornithine decarboxylase activity, vagotomy effects, G1016
  - potassium transport, viral enteritis effects (piglet), G388
  - transit, myenteric denervation and, G654
- Junction
  - choledochoduodenal, properties of neurons (guinea pig), G258
  - gap, connexin 43, expression in intestine, G911
  - gastroduodenal, flow, mechanoreceptors sensitive to, G310

## K

- Kainic acid, raphe pallidus neuron stimulation of, TRH effects, G880
- Kidney
  - galactose elimination (pig), G9
  - pressure diuresis and natriuresis, liver cirrhosis, G1045
- Kidney tubules, reabsorption, galactose (pig), G9

## L

- Lactase, intestinal, maturational expression, G1108

- Laryngeal closure, deglutition and, G704
- Length-time relations, mechanics, anorectal smooth muscle, G792
- Leucine, cotransport, small intestine, G979
- Leukocytes
  - adhesion, macrophage activation and, after liver transplant, G172
  - experimental ileitis, substance P levels in (guinea pig), G321
- Leukotriene D<sub>4</sub>, stimulation of chloride secretion, distal colon, G467
- Leukotrienes, production, gastric mucosal cells, G1021
- Lidocaine, effects on blood flow and acid output, gastric mucosa, G303
- Lipopolysaccharides, nitric oxide synthase, intestinal cell viability and, G214
- 5-Lipoxygenase, leukotriene production, gastric mucosal cells, G1021
- Liver
  - bile flow and vesicular-mediated exocytosis, intracellular alkalinization effects, G347
  - cirrhosis, pressure diuresis and natriuresis in, G1045
  - endotoxin-induced injury, TNF- $\alpha$  and neutrophil relations, G1011
  - failure, thioacetamide-induced, cerebral effects, G572
  - galactose elimination (pig), G9
  - glutamine transport, sodium-dependent, G90
  - glutathione S-conjugate transport, G547
  - hepatotoxicity, protein phosphatase inhibition by microcystin, G224
  - intracellular fatty acid transport, cytoplasmic binding protein role in, sex differences, G831
  - mechanoreceptors, with phrenic afferents, G15
  - pH regulation in, intracellular, G43
  - plasma membranes
    - adenylate cyclase and G proteins in, G686
    - fatty acid binding protein transport, G894
  - regenerating, cyclin and cyclin-dependent kinase 1 and, G857
  - sodium-bicarbonate cotransport, regulation by membrane potential difference, G1
  - sodium-coupled bile salt transport, electrogenicity of, G73
  - transplantation, leukocyte adhesion after, G172
- Losartan, angiotensin II receptor subtypes and, intestine, G21
- LTD<sub>4</sub>: see Leukotriene D<sub>4</sub>
- L-Lysine, transport systems, expression of, intestine, oocytes, G99

## M

- Macrophages, activation, leukocyte adhesion and, after liver transplant, G172
- Mannitol, gastrointestinal motility, osmoreceptor effects and, G672
- Mast cells, histamine release, endogenous somatostatin effects, G521
- Maturation: see also Development; Growth
  - epidermal growth factor and, intestinal sucrase, suckling, G459
  - intestinal lactase expression, G1108
- Mechanosensory pathways, colon, inferior mesenteric ganglion, G499

## Membrane

- apical and basolateral, dipeptide transporters in, Caco-2 cells, G289
- basolateral
  - EGF receptor phosphorylation, jejunal, G63
  - parietal cell, pH-regulating ion transport in, G903
- Hep G2 cells, bidirectional transport of intact glutathione, G1128
- oxyntic secretory, permeability of, omeprazole effects, G231
- plasma, intestinal, calcium pump isoforms, G917
- Mercapturic acid, transport, liver, G547
- Mesenteric ganglion, inferior, colon and, mechanosensory pathways, G499
- Metabolic theory of local flow control, postnatal intestine (swine), G1090
- 2-Methyl-aminoisobutyric acid, cotransport, small intestine, G979
- Methysergide, effects on blood flow and acid output, gastric mucosa, G303
- Microcirculation: see also Blood flow
  - gastric, submucosal endothelin-1 effects, G491
  - gastric mucosa, endothelin role in ethanol-induced injury, G474
  - gastrointestinal, capsaicin actions, ileum (guinea pig), G51
  - liver, leukocyte adhesion after transplant, G172
  - pancreas, sequence of changes in pancreatitis, G165
- Microcystin, protein phosphatase inhibition by, G224
- Microscopy, pancreas, sequence of changes in pancreatitis, G165
- Microspheres, radiolabeled, pancreatic blood flow, G587
- Migrating motor complex
  - cycling, nitric oxide regulation, G759
  - gastrointestinal, longitudinal contractions, G156
- Migrating myoelectric complex, gastric dilatation-volvulus, G646
- Migrating spike complex, small intestine, G619
  - enteric nervous system control of, G628
- Misoprostol, experimental ileitis, substance P levels in (guinea pig), G321
- Molecular structure, variants, sucrase-isomaltase complex, intestine, G1141
- Monolein, regulation, paracellular permeability, Caco-2 cells, G955
- Motility
  - esophageal, high-amplitude peristalsis, G1098
  - gastric
    - inhibition of, duodenal acid-induced, G540
    - interstitial cells, muscular plexus, G638
    - lateral hypothalamic lesions and, G138
    - myoelectric and motor activity, G646
    - pacing effects, G767
    - stimulation by pancreatic polypeptides, G1169
  - gastroduodenal, CCK actions on (chicken), G842
  - gastrointestinal
    - longitudinal contractions, G156
    - osmoreceptor effects and, G672
- Mucin, cholera toxin-induced secretion, neural mediation of, small intestine, G1050

- Mucus, secretion, nitric oxide stimulation of, G418
- Muscle
- circular, colon, extrinsic neural control, G1064
  - gastrointestinal, longitudinal contractions, G156
- Muscle, smooth
- anorectal
    - carbon monoxide inhibitory effects, G799
    - mechanics, G792
  - circular, fenamate activation of potassium current, jejunum, G873
  - esophageal, biphasic effects of sodium nitroprusside (opossum), G403
  - gallbladder, intracellular pathways for tonic contraction, G1082
  - migrating spike complex, fasting, small intestine, G619
- Muscle cells
- gastric, VIP-mediated activation of nitric oxide, G660
  - smooth, muscular plexus in small intestine, G638
- Muscular plexus, interstitial cells in, small intestine, G638
- Myenteric plexus
- distal colon, contractility, chloride secretion and (guinea pig), G973
  - small intestine, nitric oxide-generating sodium nitroprusside actions in (guinea pig), G887
- Myoelectric activity, gastric, with gastric dilatation-volvulus, G646
- N**
- Natriuresis, pressure, in cirrhosis, G1045
- Neural control, extrinsic, colonic muscle and epithelial function, G1064
- Neuroeffector mechanisms, peripheral vascular, experimental cholestasis, G579
- Neurons
- cholinergic, identification, enteric nervous system, G1005
  - myenteric, loss of, jejunum, G654
  - nonadrenergic noncholinergic, nitric oxide regulation, G759
  - parasympathetic, voltage-activated calcium currents in, vasoactive intestinal contractor effects, G1158
  - raphe pallidus, stimulation of acid secretion, TRH effects, G880
  - sphincter of Oddi, properties of (guinea pig), G258
- Neuropeptides, neurogenic contraction and, ileum (guinea pig), G295
- Neurotensin
- developmental expression, gastrointestinal tract, G482
  - potentiation, gastric acid and somatostatin secretion, G113
- Neurotransmitter, inhibitory, internal anal sphincter, G799
- Neutrophils
- endothelial adhesion molecules, NSAID-induced gastric injury, G993
  - TNF- $\alpha$  relations, endotoxin-induced liver injury, G1011
- Nifedipine, bicarbonate secretion and, duodenal (guinea pig), G270
- Nisoldipine, leukocyte adhesion, after liver transplant, G172
- Nitric oxide
- biphasic effects, esophageal longitudinal muscle (opossum), G403

- CCK actions and, gastroduodenal motility (chicken), G842
  - inhibitory effects, internal anal sphincter, G799
  - ischemia-reperfusion and, intestinal mucosa, G189
  - regulation, migrating motor complex cycling, G759
  - sodium nitroprusside generated by, actions, myenteric plexus, small intestine (guinea pig), G887
  - stimulation, mucus secretion, gastric mucosal cells, G418
- Nitric oxide synthase
- induction, intestinal epithelial cell viability and, G214
  - VIP-mediated activation of, gastric muscle cells, G660
- N<sup>G</sup>-Nitro-L-arginine methyl ester, CCK actions and, gastroduodenal motility (chicken), G842
- Nitrovasodilators, stimulation, mucus secretion, gastric mucosal cells, G418
- Nonsteroidal anti-inflammatory drugs
- gastric mucosal injury induced by, endothelial adhesion molecules in, G993
  - macromolecular transport and, gastric mucosa, G1135
- Norepinephrine
- extrinsic neural control, colonic muscle and epithelial muscle, G1064
  - uptake, experimental cholestasis, G579
- NSAID: *see* Nonsteroidal anti-inflammatory drugs
- Nuclear magnetic resonance, pH regulation, liver, G43
- Nuclear transcription, cyclin-dependent kinase 1 and cyclin, regenerating liver, G857
- Nucleus raphe obscurus, TRH and substance P in, opposing gastric motor responses to, G819
- Nucleus tractus solitarius, stimulation, gastric acid secretion and motility, G1169
- Nutrition: *see* Feeding

**O**

- Octreotide, afferent nerves and, rectal, G742
- 1,25(OH)<sub>2</sub>D<sub>3</sub>: *see* Vitamin D<sub>3</sub>
- Omeprazole
- gastrin cell response, achlorhydric stomach, G440
  - hydrogen-potassium-ATPase mRNA, gastric, G752
  - hydrogen-potassium-ATPase protein, oxyntic secretory membranes, G231
  - nonparallel secretion, gastric oxyntopeptic cells (toad), G934
- Oocytes, lysine transport systems, intestinal, G99
- Ornithine decarboxylase
- activity, vagotomy effects, duodenal mucosa, G1016
  - depletion, protooncogene expression after, IEC-6 cells, G331
- Osmolarity, cell survival and, gastric glands, G379
- Oxygenation, intestinal, postnatal (swine), G1090
- Oxygen radicals, acute pancreatitis, G165
- Oxyntomodulin, potentiation, gastric acid and somatostatin secretion, G113

- Oxyntopeptic cells
- gastric ammonia effects (frog), G277
  - pepsinogen and acid secretion (toad), G934

**P**

- PACAP: *see* Pituitary adenylate cyclase-activating polypeptide-38
- Pacemaker, activity, muscular plexus in small intestine, G638
- Palmitate, albumin binding, calibration of, heptane-water partition, G555
- Pancreas
- blood flow: *see* Blood flow
  - CCK-A receptor subtypes in, cloning and expression (guinea pig), G1116
- Pancreas, exocrine, secretion, secretin antagonist effects (guinea pig, rat), G805
- Pancreatic acinar cells
- signal transduction, CCK-A receptors, G999
  - trophic effects on, low- and high-affinity CCK receptors in, G1177
- Pancreatic acini, caerulein-induced phosphatidylcholine hydrolysis, phospholipase D in, G725
- Pancreatic cancer cell line, PANC-1, CCK receptors and, G149
- Pancreatic enzymes, secretion, somatostatin inhibition of, G251
- Pancreatic intrinsic factor, secretion, hormonal regulation of, G178
- Pancreatitis
- acute
    - arterial constriction, ischemia-reperfusion, and leukocyte adherence in, G165
    - PAP induced during, intestinal expression of, G611
  - Pancreatitis-associated protein, acute pancreatitis, intestinal expression, G611
- PAP: *see* Pancreatitis-associated protein
- Parasympathetic nerves, extrinsic neural control, colonic muscle and epithelial muscle, G1064
- Parietal cells
- basolateral membrane vesicles, intracellular pH-regulating ion transport mechanisms, G903
  - omeprazole effects, hydrogen-potassium-ATPase protein, G231
- Parotid acinar cells, muscarinic receptor occupancy and response in, G1122
- Parotid gland, growth marker polypeptide synthesis, transcriptional control, G514
- PD123177, angiotensin II receptor subtypes and, intestine, G21
- Pelvic nerves, extrinsic neural control, colonic muscle and epithelial muscle, G1064
- Pentoxifylline, pretreatment, endotoxin-induced liver injury and, G1011
- Pepsinogen
- CCK receptor mediating secretion, partial agonism by gastrin for, G865
  - nonparallel secretion, gastric oxyntopeptic cells (toad), G934
  - secretion, gastric chief cells, G118
- Peptides: *see also* Polypeptides
- glucagon-like, actions, gastric chief cells, G118
  - intestinal, regulation of gastric secretion, G113

- prolyl, role of DPP IV in, G81  
 trefoil, epithelial mucin-associated molecules, G205  
 vasoactive intestinal  
   activation of nitric oxide mediated by, gastric muscle cells, G660  
   duodenal bicarbonate secretion and (guinea pig), G270  
   gastrointestinal inhibitory nerves, G759  
   liver plasma membranes, G811  
 Peptide YY, regulation of gastric acid and somatostatin, neurotensin and oxyntomodulin potentiation of, G113  
 Peripheral nerves, mechanosensory pathways, colon to inferior mesenteric ganglion, G499  
 Peristalsis, high-amplitude, esophageal, topography of, G1098  
 Permeability  
   chloride, stimulation, colonic crypts, G423  
   gastric mucosa, cyclooxygenase inhibition effects, G1135  
   mucosal, nitric oxide role in, G189  
   oxyntic secretory membrane, omeprazole, hydrogen-potassium-ATPase and, G231  
   paracellular, regulation by protein kinase C, Caco-2 cells, G955  
 Pertussis toxin, plasma membrane, liver, G686  
 pH  
   extracellular, cell survival and, gastric glands, G379  
   intracellular  
     bile flow and vesicular-mediated exocytosis, liver, G347  
     ion transport mechanisms regulated by, parietal cells, G903  
     propionate-induced ion transport, HT29 cells, G564  
     ursodeoxycholic acid regulation of, bile duct epithelial cells, G783  
   regulation  
     duodenal enterocytes, G677  
     perfused liver, G43  
 Pharynx, responses, vomiting, G963  
 Phorbol myristate acetate, regulation, paracellular permeability, Caco-2 cells, G955  
 Phosphatidylcholine, caerulein-induced hydrolysis, phospholipase D effects, pancreatic acini, G725  
 Phosphoinositide, membrane turnover, vitamin D<sub>3</sub> effects, G143  
 Phospholipase D, caerulein-induced phosphatidylcholine hydrolysis, pancreatic acini, G725  
 Phospholipids, intracellular, transport, cytoplasmic binding protein effects, sex differences, G831  
 Phosphotyrosine, EGF receptor phosphorylation and, jejunum, suckling, G63  
 Phrenic afferents, venal caval mechanoreceptors with, G15  
 Phrenic nerve, venal caval mechanoreceptors with, G15  
 Pituitary adenylate cyclase-activating polypeptide-38  
   neurogenic contraction and, ileum (guinea pig), G295  
   receptors: see Receptors  
 Placenta, cholephilic anion interaction, bile acid transport, G242  
 Plasticity, gastric inhibitory innervation, immunization against VIP and vagotomy (ferret), G432  
 Polyamines  
   depletion, protooncogene expression after, IEC-6 cells, G331  
   transport, duodenal crypt cell line, G851  
 Polypeptides: see Peptides  
 growth marker, synthesis of, parotid gland, G514  
 pancreatic, stimulation of gastric functions, G1169  
 spasmolytic, epithelial mucin-associated molecules, G205  
 vasoactive intestinal  
   alkaline secretion and blood flow, duodenal, G1029  
   carbon monoxide effects, internal anal sphincter, G799  
   immunization, plasticity after (ferret), G432

neutrophil relations, endotoxin-induced liver injury, G1011
- Tumor necrosis factor- $\alpha$  antiserum, TNF- $\alpha$  and neutrophil relations, endotoxin-induced liver injury, G1011
- Tyrosine kinase, EGF receptor phosphorylation and, jejunum, suckling, G63
- U  
Ulcer  
gastric  
acidified ethanol, hydrogen chloride role in, G133  
submucosal endothelin-1 and, G491  
gastric mucosal epithelial cells, TGF- $\alpha$  and, G361  
NSAID-induced, endothelial adhesion molecules in, G993  
peptic, lateral hypothalamic lesions and, G138
- Ulceration, epithelial mucin-associated molecules, trefoil peptides, G205
- Ursodeoxycholic acid, intracellular pH regulation and, bile duct epithelial cells, G783
- V  
Vaccine, development, common mucosal immune system, G599
- Vagotomy  
gastric acid secretion and, G1169  
ornithine decarboxylase activity and, duodenal mucosa, G1016

- Vagus nerve
  - plasticity, gastric inhibitory innervation after immunization (ferret), G432
  - upper gastrointestinal responses, vomiting, G963
- Vasoactive intestinal contractor, voltage-activated calcium currents and, parasympathetic neurons, G1158
- Vasodilators, innervation, capsaicin actions, ileum (guinea pig), G51
- Velocimetry
  - laser-Doppler
    - gastric mucosal blood flow, G595
    - sequence of changes in pancreatitis, G165
- Vena cava, inferior, mechanoreceptors, with phrenic afferents, G15
- Venom, Gila monster, actions, gastric chief cells, G118
- Verapamil, bicarbonate secretion and, duodenal (guinea pig), G270
- Video image analysis, airway protection, laryngeal closure and deglutition, G704
- Vitamin D<sub>3</sub>, 1,25-dihydroxy-, membrane phosphoinositide turnover, G143
- Vomiting, upper gastrointestinal responses to, G963
